```java
public class Main {
    private static final String DB_URL = "jdbc:mysql://local
    private static final String USER = "root";
    private static final String PASSWORD = "4Skinz.123"; //d

    public static Connection conn = null;

    public static void main(String[] args) {
        System.out.println("Attempting to connect...");
        connectDB();
```
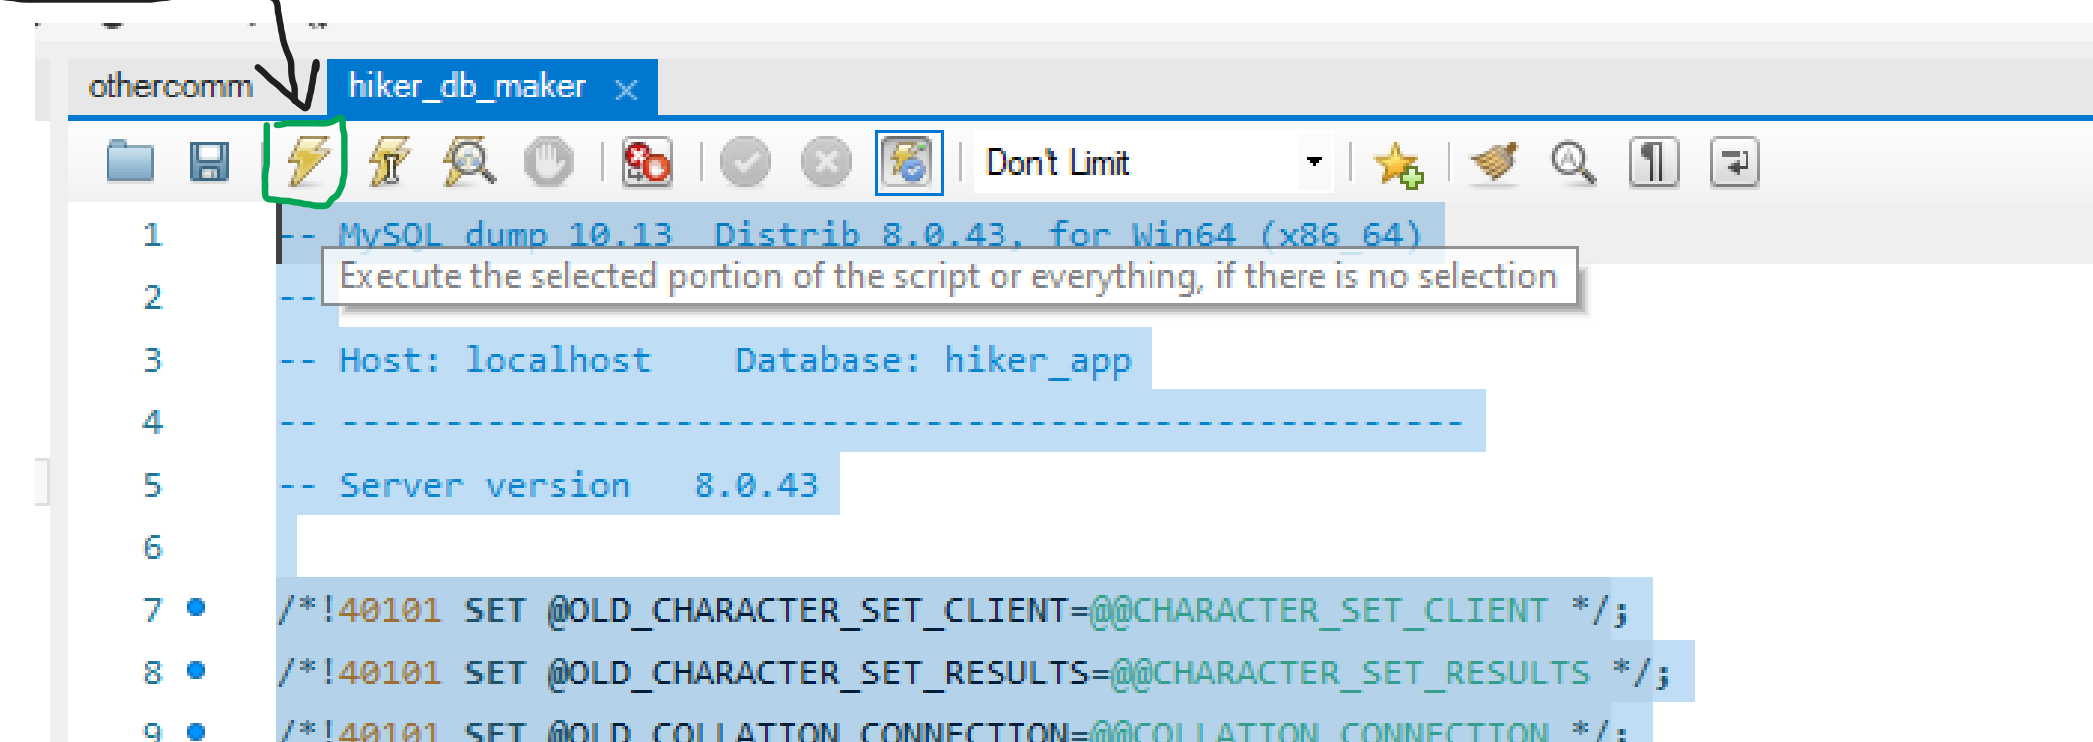

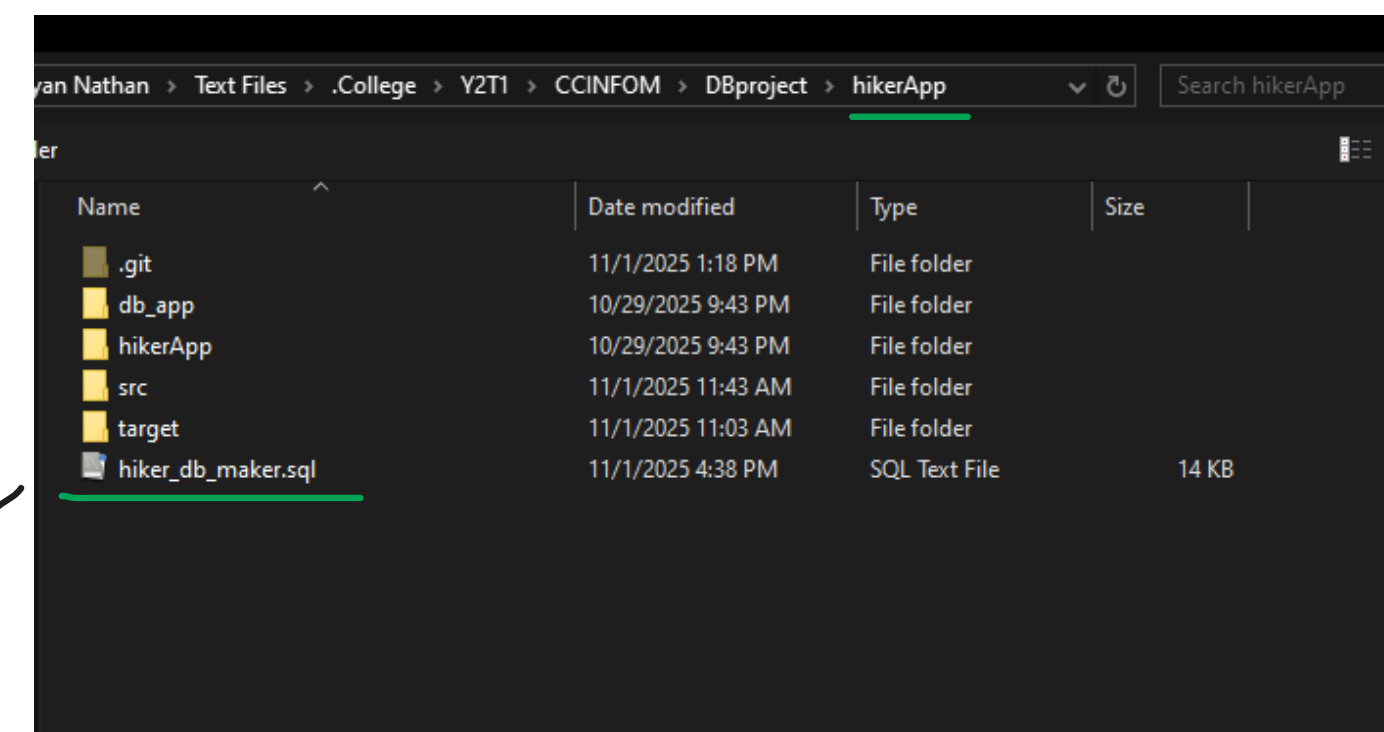

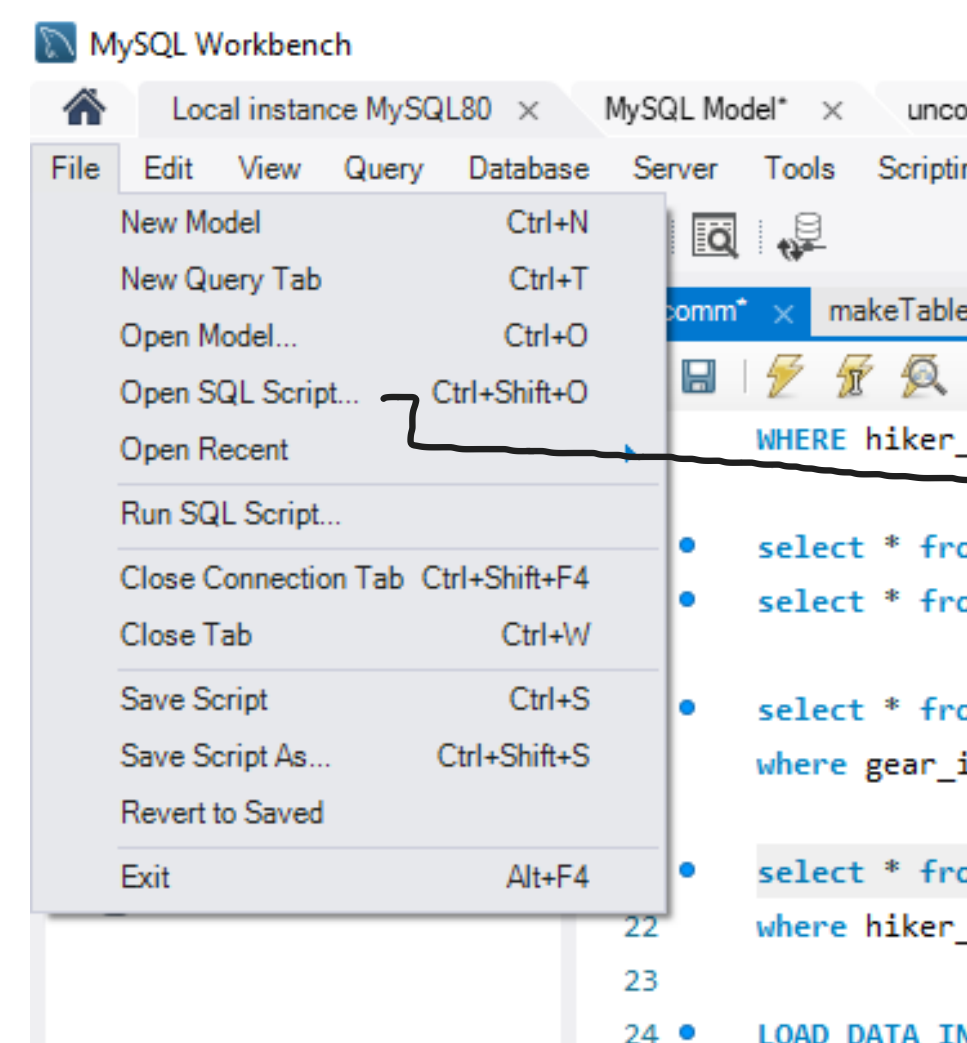

depends on your device

how to make copy of database on your device

DO THIS BEFORE RUNNING THE HIKER DB APP

refer to readme.md on how to update this
